REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Mallick et al., U.S. Patent No. 5,913,054, (herein referred to as '054) has taught a processor that is able to write to multiple registers in a single cycle of operation through execution of a multiple-register instruction.

The prior art of record, including '054, has not taught, either individually or in combination, a scheduler for managing access to multiple hardware streams according to a priority record regardless of any priority with multiple data threads, the scheduler coupled to multiple hit/miss predictors, each predictor being associated with a corresponding hardware stream, and each configured to forecast whether the associated stream will hit/miss the data cache prior to the instructions of the stream being dispatched.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
